### Product Description

#### There is a kind of laser tube

- **10 hours** working every day, it goes for **3 years**
- Cutting **3mm** acrylic board, its speed is about **25mm/s**
- Its kerf received a full of **customer praise and won reputation**

Model: Zn-1250 model 80watts laser tube

High power rate, fast - speed cutting and small size

Origin: Asia and Pacific Area China

Quality standard: International

H.S.Classification: Machinery & Electronics Electr.Element 8541 Semiconductor devices; light - emitting diodes etc.

## Contact Us

Tel:0086 769 27223327

WhatsApp:00861392925673

Email: ht@hunstlaser.com

Add: No. 3, yangwu road, shangjia, wanjiang district, dongguan city, guangdong province, China.

We will send a new one freely if the tube is broken during transit.

Once received the laser tube, please check again at the first time. We need the damaged record from the courier as the proof before we send

## F Feature

**Output Power:** Its output power can reach 100w. The production process of the tube is standardized, so the output power and output model are the same as other laser tube manufacturers: can't provide this product)

**Long life span:** We have catalyst plating in the inner wall of the laser tube. Designing lifespan is 10,000 hours and the warranty is 10 months. (Other brands: is used by other model laser tubes. Their lifespan is from 3000 hours to 6000hours and the warranty is only 3months to 6 months)

**High performance cost ratio:** High output power, high efficiency, and high performance cost ratio.

**High photoelectric conversion rate:** The output power will decrease for less than 2w when the cooling water's temperature is 42°C. Its heat productivity is lower than 60w tubes of other brands. (Other brands: The output power decrease rapidly when the cooling water's temperature is 42°C)

## A Advantage

**Appearance:** The tube is sealed by metal material. It is industrial product. (No metal material is used by other manufacturers. Their tubes are extra water cooling for front and rear mirrors).

**Tube frame:** This is exclusive design for Zn series laser tube. You can use it to install our laser tubes into the machine to spare the freight cost, shockproof and makes sure the tube will not move during the transport.

**Length:** The length is only 1.25m. It reduces the volume of the machine and minimizes freight cost.

## U Used for

Zn1250 model CO2 laser tube is featured as high power rate, good model, and fast - speed cutting and small size, which is used for the cutting of acrylic board cutting, etc.

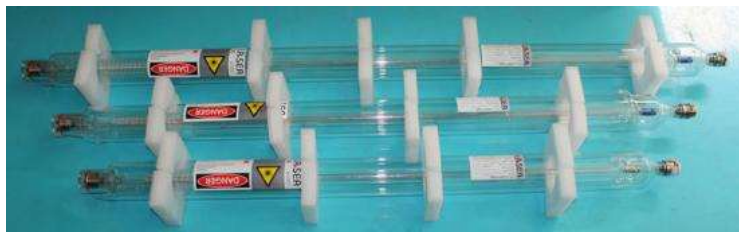

## B Benefit

**High photoelectric conversion rate:** Water Chiller should be equipped. The output power will decrease for less than 1w when the cooling water temperature is 42°C. Its heat productivity is lower than 60w tubes of other brands. (Other brands: The output power decreases rapidly when the cooling water temperature is 42°C)

**Warranty:** 10 months, international warranty service,

**High performance cost ratio:** When you buy Zn1250 model Laser tube, you can spare money for sheet metal, transport. Besides, you get 10% off the top level after sale service.

## Product Details

Laser tube

Negative electrode container

Product number in metal terminal

Terminal of high voltage and insulating sheath

Output mirror

Laser spot with depth of 5mm

### Packaging & Shipping

Model	Rated Power	Max Power	length	Φ	Catalyze	Life span	Warranty
Zn-1250	80W	100W	1250mm	80mm	Yes	10,000h	10 months

Packing	GW	NW	Size (L x W x H)cm	Vol weight
Inside carton box	18kg	3kg	155x35x35	38kg
Outside wooden box
