Product Description

The ETC-1280L model motorized up down table laser cutting machine is well suitable for cutting thick material and fix with a rotary device, the items, this machine cooperating in factories under comprehensive quality management system and its three indicators namely stability, accuracy reached the world first-class standards.

Features:

- 1.With electric lifting platform , unique automatic focusing function, carving, cutting articles of different plane;
- 2.Three-dimensional carving effect of rotating device can effectively realize the circular objects.Lifting platform of laser carving and engraving machine round objects.
- 3.Design of lifting platform to meet user requirements for sculpture the thicker materials; breakthrough type design, suitable for the over length electric lifting platform Table table, matching AF system can facilitate accurate AF;
- 4.Frozen type air pumping device completely solves the laser processing emissions asked closed suction system as well as the Questions of process requirements;
- 5.Selection of three-phase hybrid stepper driving system, to ensure stable operation, incision smooth, accurate size, adjustable import patent ensure the precision of laser operation.

Applicable Industry

The advertising industry, decoration industry, craft gift industry, electronic industry, model industry (construction models, aviation and navigation toys).
