### Product Description

#### Product Introduction

Lace is also called the flower design fabrics, which are widely used in textile, underwear industry. Due to its soft and permeability, it has a artistic mysterious and elegant which are be loved by women. But the fabric is not easy to cut because of its soft. One of the traditional cutting way is of all, manually overlay every layer to 10-30 layers and put into the die cutter (punching shear), or put flower shape model of ray paper, then make saw. Finally sort out the pieces manually. It was wasting time and manpower. The demand on skills of workers is high. The waste of material suitable for the changes of production now. Therefore, after several years of research and development, finally HUNST team successfully dev automatic intelligent laser cutting machine for lace. Through using by professional manufacturers, which fully meets the requirements of prod

#### 1. Technological Comparison

##### Traditional Cutting Process

① manual fixed-length before cutting

② manually fold 10 to 30 layers

Add: No. 3, yangwu road, shangjia, wanjiang district, dongguan city, guangdong province, China.

③position using steel needle punching

④Position flower design using cardboard model

5. Multi-layers Manual cutting

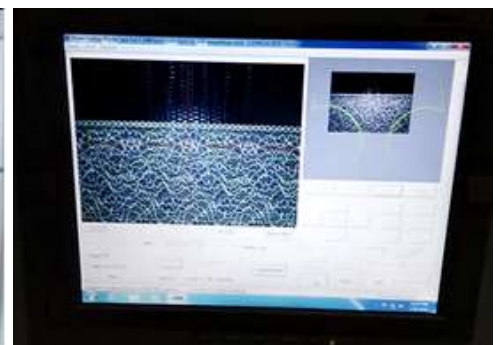

Want a method that would replace manual cutting by machinery ?  
Is it possible that 1 man can cut 200 different lace using one machine in a day?  
**With Hunst Large Vision Laser Cutting Machine , It Is Not A Dream !**

①Automatic feeding

②Software set mould

③Automatically cut

④Sort the pieces

To satisfy your cutting needs , all you need is Hunst Large Vision Laser Cutting Machine

### Packaging & Shipping

Automatically Laser Cutting Machine for Lace

HUNST Laser Is The Only Supplier in China owns :

Research and Development of Visual Image Recognition Software + Motion System Mechanical Design +Laser Equipment Manufacture v  
Machine Structure Design, of All-round Research and Development

Man Power Cost:

Items	Traditional Cutting	Laser Cutting
Man power for cutting	1	1 ( Machine 2sets )
Man for Positioning	6	
Man for sorting	1	2
Total	8	3
Others:		
Items	Traditional cutting	Laser cutting
Reject rate	5%	1%

Saving	laser cutting for patterns can be more compact	10%
Fastness of edge	Loosen easily	No loos

**Applicable material and industry**

Laser cutting machine for lace and also apply for underwear and other industry that need to use the lace.  
Product Introduction

After more than three years of research and development, HUNST laser cutting machine for lace specially, which successfully achieved the ac deformation matching algorithm to the current visual recognition and mistake handling of auto-feeding cause the special technology of recogni design.

The machine combines advantages of image recognition software of core visual , machine movement system with the whole machine structr technology design to achieve automatic recognition of high-speed and multi flower design of lace shape cutting in one-time, realization of who auto-feeding and cutting in one-time.

The breakthrough of this technological problem marked the birth of new generation of the technology of lace cutting. With this technology put it means that HUNST technology of lace cutting has reached the industry-leading level, but also means that the lace laser cutting machine in pl are no longer exist!

<b>Technical parameters:</b>	
Model number:	ETS-4012LF
Laser head quantity:	Single head
Laser type:	Sealed CO2 Glass Tube
Laser power:	80W/100W /130W/ 150W
Cooling system:	Air conditioner thermostat water circulation system
Cutting speed:	≤450MMS
Cutting table:	Laser cutting machine for lace specially auto-feeding table
Power Supply:	AC220V ±5%/50HZ
Gross Power:	3000W
